Praktikum Algoritma dan Pemograman

Tugas Pekan 3

Flowchart

Pseudocode

Judul

Menghitung volume tabung

Deklarasi

Var r, t, volume : double

Algoritma

1. Display "Masukkan jari-jari tabung: "
2. Input r
3. Display "Masukkan tinggi tabung: "
4. Input t
5. Set volume $\leftarrow 3.14 * r * r * t$
6. Print "Volume tabung = "

Kode program Java

```
3 import java.util.Scanner;
4
5 public class HitungVolume {
6
7     public static void main(String[] args) {
8         double r;
9         double t;
10        double volume;
11        Scanner keyboard = new Scanner (System.in);
12
13        System.out.println("Masukkan jari-jari tabung: ");
14        r = keyboard.nextDouble();
15        System.out.println("Masukkan tinggi tabung: ");
16        t = keyboard.nextDouble();
17        keyboard.close();
18
19        volume = 3.14 * r * r * t;
20        System.out.println("Volume tabung = " + volume);
21    }
22
23 }
```

Output program

```
terminated> hitungVolume.java /Applic
Masukkan jari-jari tabung:
7
Masukkan tinggi tabung:
14
Volume tabung = 2154.04
```
